Bathroom Cleaner & Disinfectant

— DEB-10158

A revolutionary system that combines convenience, performance, and real savings.

Economical

*Save \$400 to \$600 in installation costs compared to conventional systems.

Eco-Friendly

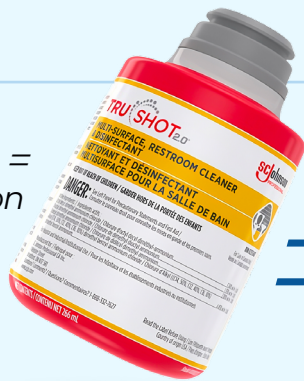

Avoids discarding the solution after 2 days by providing a fresh solution at all times.

Convenient

Portable and lightweight. Ready to use in seconds. Frees up housekeeping carts from clutter.

1 Cartridge =
26.5L of solution

How To Use TruShot 2.0

DEB-10168

01

Insert the Refill

Remove the cap from the TruShot 2.0 concentrated cartridge. Insert the cartridge into the gun, turning it until it clicks into place.

02

Fill With Water

Fill the gun's bottle with water up to the indicated mark. The system automatically dilutes the concentrate to the ideal concentration.

03

Spray and clean

Spray onto the surface to be cleaned, then wipe.

04

Replace the refill

To change products or when the cartridge is empty, remove and insert a new TruShot 2.0 cartridge. The gun is reusable indefinitely.

Benefits

No user training required

No wall installation, and no periodic calibration.

No risk of forgetting to shut off water when the system is idle, eliminating any risk of water damage.

No handling of chemical products and no risk of accidental spills.

No more need to apply ready-to-use labels.

Impossible to refill with a product that doesn't match the label.

No more need to replace disinfectants every 48 hours to maintain a fresh solution.

Saves time, money, and resources every day.
